Application Manager (m/f/d)
#for product development

Jetzt bewerben!

Your challenge

- In this role, you will be responsible for the technical availability of our susietec® software product family (www.susietec.com)

- You ensure the security and quality assurance of the systems in the backend (databases and interface support)

- You carry out system tests with regard to data content, performance and security

- You take over the processing of customer tickets and the analysis of incidents

- As Application Manager, you are responsible for deployments and provide support for the transfer of new developments into regular operation

- You work within an interdisciplinary product team on the further development of new areas of application

- Together with Product Management, you advise our customers on possible areas of application

Your profile

- Completed education (HTL/FH/University - preferably with a technical focus)

- 3 years of professional experience in the implementation and/or operation of BI applications is desirable

- Experience in 1st and 2nd level support

- Sound knowledge of Microsoft products (e.g. Windows/MSSQL Server/XML/JSON/C#/.NET) and BI applications

- Project management experience desirable

- ITIL basic knowledge is an advantage

- Very good written and spoken German and English skills

- You are customer-oriented and communicative

- Problem solving does not upset you

Location:
Linz, (remote working possible)

Salary:
The IT KV minimum basic salary is from € 3,724.00 depending on qualifications and experience, an overpayment is offered. The actual financial offer depends on individual qualifications and specific professional experience.
